Numb. 2070

The London Gazette.

Published by Authority.

From Thursday *September* 17. to Monday *September* 21. 1685.

Rome, September 1.

THIS Morning arrived here an Expreſs with the News of the defeat of the Turks in the *Morea* and the taking of *Coron* by the Venetians, which hath very much increaſed the Joy we were in for the Victories obtained by the Imperial Forces in *Hungary*. An Envoy is arrived here from the Emperor about the Supplies which the Pope has promiſed to ſend to the Duke of *Lorrain* for the Service of this Campagne; And we are aſſured that in few days a conſiderable Sum of Money will be remitted from hence for that purpoſe to *Vienna*. There is much diſcourſe of a Promotion of Cardinals.

Venice, Sept. 8. *Te Deum* has been ſung in all the Churches of this City, and on *Tueſday* laſt there was a ſolemn Proceſſion at which the Doge and all the Nobility aſſiſted, for the happy Succeſs of the Arms of the Republick in the *Morea*. The Senate have given a Medal and Chain of Gold to Lieutenant Colonel *Magnanino* who brought the News of it; and a yearly Penſion of 600 Ducats to the Ingenier *Baſſignani* for the good Services performed by him in the Siege of *Coron*. We are aſſured that at the taking of that Place above three thouſand Turks with their Baſſa were put to the Sword; and on our ſide there were about four hundred killed, among which were two Knights of *Malta*; and Prince *Philip* of *Savoy*, the Prince of *Brunſwick*, the Marquiſs *de Courbon*, the Marquiſs *de St. Paul*, and 30 Knights of *Malta*, with ſeveral other Perſons of Quality were wounded; The Chriſtians found in the Place 76 Pieces of Braſs Cannon, with a great quantity of Ammunition and Proviſions, and the Plunder of the Soldiers is reckoned at above two Millions; beſides what they took in the Enemies Camp after the defeat of the Turkiſh Forces which came to the relief of *Coron*, where the Booty was likewiſe very conſiderable to the Soldiers, and the Republick gained nine Pieces of Cannon and two Mortars; Above 1000 of the Enemy were killed in that Action, and among the reſt *Kalil* Baſſa Viſier of the *Morea*. The Senate have had no Letters from Captain General *Moroſini* ſince thoſe of the 11th of the laſt month, which gave an account of the ſaid defeat, and the taking of *Coron*, but by particular Letters by the way of *Zant* we are informed that 300 Maynotes had put themſelves into the Service of the Republick, and that theſe had aſſured the General that a far greater number would follow their Example: That the Forces of this State continued in the Neighborhood of *Coron*, the General not thinking fit to remove from thence till he had put the Place, (the Fortifications whereof were very much ruined in the Siege) into a Poſture of Defence: Theſe Letters add, That the Turkiſh Gariſon in *Modon* being in a great Conſternation upon the taking of *Coron*, had ſent Deputies to Captain General *Moroſini* to Treat about the ſurrender of that Place, but this needs a Confirmation. The reports we had of a Fight between the Turkiſh Fleet and the Ships of the Republick commanded by *Signior Mocenigo* and *Signior Delfino* and of the latters having obtained a great Victory prove to have been without Ground. The laſt Letters from *Dalmatia* told us that the Proveditore General *Valier* was at *Spalato*; and that the Vayvode *Franco* was drawing together a great Body of Morlacks with a deſign to attack ſome place in the Province of *Boſnia*.

Dantzicke, Sept. 5. The King of *Poland* and his eldeſt Son Prince *James* parted the 25th of the laſt month from *Villa Nova*, and came in the Evening to *Prage*, where the next day his Majeſty, accompanied with the Pope's Nuncio and the Emperor's Ambaſſador, aſſiſted at the ſinging *Te Deum* for the defeat of the Turks near *Gran*, and the taking of *Newheuſel*. The 27th the King continued his Journey towards *Ruſſia*, and arrived the 28th at *Karenzo*, and the 30th at *Czerminck*. The Letters from *Lembourg* tell us, That the Poliſh Army was Encamped near *Trembowla*, the Forces of *Lituania* not having yet joyned it: That they had defeated ſeveral Parties of Turks and Tartars, who thought to diſturb them in their march; and that the Crown-General had received advice that the Seraſquier *Soliman*, to whom the Grand Signior hath committed the conduct of his Army againſt the Poles, hath not yet been able to form a Body of above 24000 Men, though the greateſt part of it are Tartars. The ſame Letters tell us, That the Turks have lately put a great Convoy of Proviſions into *Cuminiec*; and that that Place is very well provided with all things neceſſary for its Defence; And that the Grand Signior has depoſed the Vayvode of *Valachia*, having put *Conſtance Sedar*, one of his chief Officers, into his place.

Vienna, Sept. 9. The Elector of *Bavaria* returned hither the ſixth Inſtant from *Hungary*, and intends to part from hence again on *Monday* next with the Archdutcheſs his Wife for *Munick*. The laſt Letters from the Imperial Camp near *Peſt* are dated the ſixth of this Month, They tell us, that beſides *Novigrad* and *Vaccia*, the Turks have likewiſe abandoned *Haiman*, a Place of that conſideration, that a Baſſa commanded there, which they left in ſo much haſte, that they had not time to demoliſh the Fortifications; That the Seraſquier when he was now lately Encamped in the Plains of *Peſt*, had with him above 50000 Men, but that before he repaſſed the *Danube*, the Tartars which were about 4000, left the Army and went home; And the Baſſa's of *Waradin*, *Temeſwaer* and *Agria*, were ſent back with the Troops under their Command to their reſpective Governments; And that the Seraſquier had poſted himſelf with the reſt of his Forces between *Buda* and *Alba Regalis*. We do not yet know what further Action the Duke of *Lorrain* will undertake; He has ſent 6000 Men to reinforce the Body Commanded by General *Leſlie*, who, as our Advices from *Croatia* aſſure us, is making Preparations to beſiege *Poſſega* the Capital City of *Sclavonia*; And at the ſame time Count *Herberſtein* Governor of *Carelſtadt* will attack *Wihitz* the chief Town of *Croatia*. A great many Carpenters, Maſons, and other Workmen, have been ſent to *Newheuſel* to work with the Gariſon for the repairing the Fortifications of that place, which is

ſo
